Dual Outputs from Marantz SR 8015

Monitor Out 2   Fibre HDMI active Cable

Monitor Out 1

Marantz SR 8015

Epson Home Theatre EH-TW9400 4K PRO-UHD 3LCD Projector

4K HDTV

NVIDIA Shield TV Pro | 4K HDR

Apple TV | 4K HDR

TATA SKY Binge Box | 4K

Inputs to Marantz SR 8015

Problem Faced

1. In amplifier I have selected dual output (Auto)
2. If I switch on Epson Projector then output (4K HDR) is displayed properly on projector (4K)
3. If I switch on TV then output is displayed on TV (4K) but there is constant blackout for few seconds -
4. Have tried with Smart Select Memory option too by setting Monitor 1 select and Monitor 2 for each of the display but the problem persist

Trouble Shootings done

1. Connected 4k TV with High Quality Active HDMI . (Result- Projector works perfectly but when Projector is on standby mode and I switch to TV the Black out issue persist)
2. Removed projector HDMI Cable from AV Receiver . (Result- TV display works perfectly both with Active HDMI cable and Non Active HDMI Cable.)
3. Projector HDMI Cable Connected and Power is completely switched off (instead of standby mode). (Result- TV display works perfectly both with Active HDMI cable and Non Active HDMI Cable.)
4. Have set Smart Select Memory Switch for Monitor 1 and Monitor 2 with Projector Standby. ((Result- Projector works perfectly but when Projector is on standby mode and I switch to TV the Black out issue persist)
